

# COVID-19

## Care when shopping

### Coins & Banknotes

There is no proof that COVID-19 can be transmitted through coins or banknotes. However, respiratory droplets expelled from an infected person can contaminate surfaces.

Wash your hands regularly and thoroughly after touching any frequently-touched surface or object, including coins or banknotes.

Do not touch your eyes, mouth and nose when hands are not clean.

### Groceries

When grocery shopping, keep at least 1m from others and avoid touching eyes, mouth and nose.

If possible, sanitise the handles of shopping trolleys or baskets before shopping.

When you return, or receive delivery of new groceries, wash your hands thoroughly and again after handling and storing your products.

There is currently no confirmed case of COVID-19 transmitted through food or food packaging.

### Fruit & Vegetables

Before handling them, wash your hands with soap and water.

Then wash the fruit and vegetables thoroughly with clean water, especially if you eat them raw.
